Summary

A graduate in Information Science and Engineering, currently working as a Developer at Avedis Infosys. Experienced in application development, server management, SEO optimization, and cybersecurity practices, with exposure to AI, NLP, and research-driven projects. Skilled in building scalable systems and solving real-world technical challenges.

Education

Alva's Institute of Engineering and Technology

Bachelor of Engineering in Information Science and Engineering

Oct. 2021 – Jun. 2025

Mangalore, Karnataka

Experience

Developer – Avedis Infosys

Development and Infrastructure Operations

Current Role

Udupi, India

- Worked on application development along with advanced SERVER management and website hosting.
- Developed and contributed to **cybersecurity**-related projects and implemented security best practices.
- Handled SEO optimization, performance tuning, and DNS/domain configurations.
- Managed deployments, system monitoring, and troubleshooting across production environments.
- Resolved both technical and non-technical client queries with efficient problem-solving.

GIS Intern – IEEE & IISc Collaboration

Geospatial AI and Remote Sensing

Oct. 2023 – Dec. 2023

Mangalore, India

- Led a 4-member team to analyze the Shanthi Sagar catchment area using Sentinel and Landsat satellite imagery.
- Utilized QGIS and Google Cloud Platform to develop automated geospatial analysis workflows.
- Generated thematic maps and visual insights to support environmental planning and conservation research.

Web Development Intern – Blue Bird Data Solutions

Full-Stack Development

Apr. 2024 – May 2024

Mangalore, India

- Built a responsive real estate website using Next.js, React.js, Tailwind CSS, and TypeScript.
- Handled API routing, state management, and email automation using Axios and MongoDB.

Relevant Coursework

- | | | |
|----------------------------------|-------------------------------|------------------------|
| • Data Structures and Algorithms | • Artificial Intelligence | • Internet of Things |
| • Operating Systems | • Web Technologies | • Cloud Computing |
| • Computer Networks | • Object-Oriented Programming | • Information Security |
| • Database Management Systems | • Software Engineering | • Neural Networks |

Projects

LingoGem AI Language Translator | AI, NLP, Prompt Engineering, Web Application

2026

- Developed an AI-based web application for real-time multilingual language translation.
- Implemented prompt engineering techniques to improve translation accuracy and response quality.
- Integrated automatic language detection, voice input/output, and optimized user experience.

Dual-Axis Solar Tracking System | AI-Enhanced IoT, Embedded C, Sensors

March 2023

- Developed a dual-axis solar tracker using Arduino, embedded C, and LDR sensors for optimal light capturing.
- Integrated real-time data monitoring and predictive alignment to maximize power performance.
- Led the team to secure 1st place in a regional IoT project exhibition in Mangalore.

Automatic Characteristic FTIR Frequency Analysis | Python, REST API, Machine Learning (PCA)

May 2025

- Built an automated FTIR analysis system with the Alpha 2 spectrometer for chemical data processing.
- Developed REST APIs for real-time data upload, baseline correction, and peak detection.
- Applied PCA and unsupervised learning for cluster analysis and advanced data visualization.

Sales Forecasting and Trend Analysis | Predictive Analytics, Python, Power BI

October 2024

- Analyzed historical sales data using Statsmodels to identify seasonal patterns and revenue drivers.
- Built a forecasting model using ARIMA/Linear Regression to assist in business strategy.
- Visualized deep-dive insights using Matplotlib and Power BI dashboards.

Technical Skills

Languages: Python, Java, C, JS, SQL, TS	AI & Data: NLP, PCA, Predictive Modeling
Frameworks: React, Next.js, Node.js, Express	Tools: Git, Docker, Postman, GCP, Linux
Databases: MongoDB, MySQL, PostgreSQL	Infrastructure: DNS, SSL, Server Hardening
Design: Figma, Tailwind CSS, Bootstrap	Analytics: Power BI, NumPy, Pandas

Leadership / Extracurricular

Hackathon Coordinator – AIET

Sep. 2022

Intra-college Coding HackathonMoodbidri, Karnataka

- Organized and managed a coding hackathon for 100+ students; led technical logistics.
- Coordinated with mentors to ensure smooth execution of the 24-hour event.

Team Lead – GIS Project with IEEE & IISc

Oct. 2023 – Nov. 2023

Remote Sensing InitiativeMangalore

- Managed a multidisciplinary team of 4 to deliver geospatial reports ahead of schedule.
- Presented project findings to IEEE delegates and university research panels.
